WORK EXPERIENCE

Graphic Designer Intern

**Sri Lanka Institute of Information Technology - Department of
Marketing & Outreach**

August 2025 - February 2026

- Designed social media posts and promotional graphics for student intakes, Open Days, Professional Development Programmes, degree programmes, and festive/awareness campaigns.
- Created print-ready and digital-ready artworks including X-banners, roll-up banners, event promotional materials, flyers, and supporting institutional visuals.
- Contributed to 100+ social media post designs, 50+ event promotional artworks, 10+ banner designs, and 10+ programme promotional materials during the internship.
- Followed SLIIT brand guidelines, typography standards, logo placement rules, color consistency, and layout requirements across print and digital outputs.
- Used Adobe Photoshop, Adobe Illustrator, and Canva to create, edit, refine, and export professional design materials for publishing and printing.

WORK EXPERIENCE

Junior Graphic Designer

Purple Mango | Colombo, Sri Lanka

May 2025 Present

- Design social media creatives, promotional visuals, and digital marketing content for client brands across business, tourism, hospitality, and corporate sectors.
- Create brand-consistent static posts, campaign visuals, image-text layouts, captions, and hashtag-based content for social media platforms.
- Support visual content planning for client promotions, website/service announcements, festive posts, awareness posts, and marketing campaigns.
- Develop creative layouts that improve readability, visual hierarchy, audience engagement, and brand consistency.
- Work with feedback from team/client requirements and revise designs to meet campaign goals and brand standards.

PROJECTS

Hotel Management System

Designed intuitive interfaces for a hotel management system, including customer and staff portals, with a focus on user research, wireframing, and usability testing to enhance workflows.

Technologies Used: Figma, React, Tailwind CSS

Reference:

<https://www.figma.com/design/6YH2NXaudIZP0Sq3mG0kge/HMS?node-id=0-1&t=53M54uv9oYlqpAPr-1>

Image Processing App

Developed an image processing tool with Python, Tkinter, and TensorFlow, featuring a user-friendly GUI for image manipulation, classification, object detection, and style transfer. Optimized for real-time processing and seamless user experience.

Technologies Used: Python, Tkinter, Tensorflow

Reference: https://github.com/Ruviii/ImageProcessing_Tool

Forced Perspective Video

Created a dynamic forced perspective video by strategically positioning objects and manipulating camera angles to create the illusion of varying scale and depth.

Tools Used: Capcut, DSLR Camera
